

## AMENDMENTS TO THE CLAIMS

The listing of the claims will replace the previous version, and the listing of the claims.

## LISTING OF CLAIMS

1-9. (cancelled)

10. (new) A computer-assisted learning apparatus, comprising:

a computer-controlled display screen for displaying predetermined learning materials to enable a trainee to learn based on a displayed content, said display screen including equally divided first to fourth multiple screen sections, said first screen section constituting an explanation text display field in which explanation text related to predetermined training contents is displayed, and the second to fourth screen sections constituting related-information display fields including illustrated information showing illustrated contents of the explanation text, simulation information for experiencing the contents of the explanation text as simulation, and movie information for displaying the contents of the explanation text as animation, and

a memory for memorizing the predetermined learning materials having a base file in a HTML format, said base file including a first folder having an explanation text folder containing the explanation text and a first module for displaying the explanation text in the first screen section, and second to fourth folders having second to fourth modules for displaying the illustrated information in the second to fourth screen sections, respectively, said first to fourth folders being arranged hierarchically and said first to fourth modules being retrieved and read to be associated with each other.

11. (new) The computer-assisted learning apparatus according to claim 10, further comprising a screen zoom function enabling arbitrary change of a screen size of each of the first to fourth screen sections.
